2026 Subject Index

Title	Page
A case of early-stage lung cancer diagnosed concurrently with dasatinib-induced pleural effusion in a patient with chronic myeloid leukemia	20
A case of granulomatous lymphocytic interstitial lung disease considered as sarcoidosis	27
Assessment of radiation knowledge, attitudes, and behaviors among hospital secretaries working near diagnostic imaging units	14
Clinical and radiological presentation of multiple intracranial tuberculomas mimicking brain metastases: a case report	23
Clinical characteristics and mortality risk factors in COVID-19 patients with pulmonary embolism	111
Comment on: The relationship between troponin levels in pneumonia and the severity of pneumonia and the oxidant-antioxidant balance	92
Comparison of pulmonary embolism in oncology patients with the general population in terms of diagnosis, clinical features and prognosis	102
Current approaches to the diagnosis, treatment, and prognosis of sepsis	23
Evaluation of factors associated with mortality after major lower extremity amputation: implications for intensive care	95
Evaluation of the clinical course of acute phase reactants and associated factors in geriatric patients followed up in icu due to community- and hospital-acquired pneumonia	67
Incidence and prognostic value of COVID-19-associated coagulopathy in intensive care unit patients: a retrospective cohort study	1
Intensive care utilization in COPD and advanced-stage lung cancer	13
Ischemia-modified albumin as a marker of disease severity and hospitalization in community-acquired pneumonia: a prospective case–control study	7
Nutritional approach outcomes in palliative care patients with malnutrition	1
Pandoraea spp. infection in the course of post-COVID pulmonary fibrosis: a rare case report	27
Phenotypic assessment of COPD using clinical, radiological, and functional parameters	60
Sleep-disordered breathing and nocturnal hypoxemia in patients followed for pulmonary hypertension	118
Stepwise LMA–fiberoptic bronchoscopy–double-lumen tube airway management for one-lung ventilation in a young patient with pulmonary hydatid cyst: a case report	88
Systemic sclerosis-associated interstitial lung disease complicated by precapillary pulmonary hypertension: a real-world case	123
The prognostic value of PET/CT-derived volumetric parameters for postoperative recurrence in resected non-small cell lung cancer	79
The relationship between the severity of COVID-19 pneumonia and ABO blood groups	73
The relationship between troponin levels in pneumonia and the severity of pneumonia and the oxidant-antioxidant balance	7
