Dear Colleagues,

As of February 2023, we have published the first issue of **Journal of Pulmonology and Intensive Care (JoPIC)** under the shield of Medihealth Academy. In addition to all researchers, referees and editorial board who contributed to the preparation of the journal; we would like to thank the printing team for their effort in preparing it for publication. Our main purpose in realizing the idea of this journal is to create a new platform for research that we believe will contribute to the literature in the fields of Chest Diseases and Intensive Care, as well as to increase the motivation of researchers with fast and effective article evaluation and publication processes. This first issue includes three original research, one review article and a case report. Periodicals are popular with their readers and researchers. In the upcoming period, with your support, our goal is for JoPIC to be indexed in nationally and internationally accepted scientific indexes. I would like to thank you in advance for your contribution.
